|                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                         |                   |          |
|                                                    | Called to meet HOA president on May 21 about valve #39 making a strange sound (normal water discharge sound), president thought it might be a leak.                                                                                                                                                                                                                                                                     |                   |          |
|                                                    | There was no leak and low pressure as he stated a few minutes before but while we were there the zone lost pressure. We checked the pumps and found out that 2 booster pumps and one submersible pumps were not turning on due to a tripped breaker. Charge will be for service call on May 21. May 24, second call for valve #7 showing error in timer. Fixed by replacing solenoid. Charge will be for solenoid only. |                   |          |
